REMOTE DEPOSIT CAPTURE — MOBILE APP STORY MAP

Customer goal: safely deposit a check from my phone, understand the outcome, and optionally explore bank offers.

LEFT TO RIGHT = chronological activities. TOP TO BOTTOM = steps, error/recovery variations, then optional enhancements.

Phone platforms and sign-in methods are alternatives: each customer chooses the supported route rather than completing every option.

	1. Install and prepare	2. Sign in securely	3. View accounts and choose	4. Capture the check	5. Enter and validate	6. Review and submit	7. Track deposit and get help	8. Explore offers
MAJOR ACTIVITIES								
MAIN STEPS MVP / Release 1 Read steps in each column from top to bottom.	S01 Download for iPhone	S05 Use portal credentials	S08 View accounts and balances	S10 Prepare camera and check	S14 Enter check amount	S17 Review account, amount, images	S19 Receive acknowledgement	S21 View bank offers
	S02 Download for Android	S06 Use an approved alternative	S09 Select eligible deposit account	S11 Take check-front picture	S15 Enter required check details	S18 Confirm and send e-check	S20 Refresh status and balance	S22 Open promotion details
	S03 Download for Windows Phone	S07 Sign out; lock idle sessions		S12 Take check-back picture	S16 Match images against details			
	S04 Check remote-capture readiness			S13 Preview and retake securely				
ERROR / RECOVERY MVP / Release 1 Return to the same step after correction.	E01 Setup or eligibility problem	E02 Wrong credentials: retry/recover	E04 Balance unavailable: show stale state	E06 Camera denied: enable or cancel	E08 Invalid amount or missing fields	E10 Network timeout: check outcome	E12 Rejected/pending: show next action	E13 Offers unavailable: continue banking
		E03 Expired code: request a new one	E05 Ineligible account: choose another	E07 Blurred or missing side: retake	E09 Image/detail mismatch: correct	E11 Duplicate/fraud alert: block and explain		
ENHANCEMENTS Release 2 Builds on the MVP; not needed to finish a basic deposit.	—	O01 Fingerprint sign-in with fallback	O03 Remember preferred account	O04 Auto-capture with edge guides	O05 Suggest amount; always verify	O06 Resume an encrypted unsent draft	O07 View deposit history	O09 Choose personalized offers
		O02 Touch ID sign-in with fallback					O08 Opt into status notifications	

S = normal story; E = error/recovery variation; O = optional improvement. Every card has an expanded user story and source trace in this document.

Both front AND back images, amount entry, account selection, image/detail validation, secure submission and promotions are mandatory MVP scope.

Offers are an independent branch, never a deposit prerequisite. Submission acknowledgement is not a promise that funds are cleared or immediately available.

Readable story map — activities, steps and variations

This is the same story map as the landscape first page, expanded as selectable text. The backbone is Install → Sign in → View/select accounts → Capture → Enter/validate → Review/submit → Track/help; offers are a separate optional customer activity. The MVP includes the main steps AND error recovery; the second release adds convenience features.

1. Install and prepare

Customer outcome: Use the service on my phone.

Main steps — MVP: S01 Download for iPhone; S02 Download for Android; S03 Download for Windows Phone; S04 Check remote-capture readiness

Error/recovery variations — MVP: E01 Setup or eligibility problem

Optional enhancements — Release 2: No additional story in this release.

2. Sign in securely

Customer outcome: Access my bank identity.

Main steps — MVP: S05 Use portal credentials; S06 Use an approved alternative; S07 Sign out; lock idle sessions

Error/recovery variations — MVP: E02 Wrong credentials: retry/recover; E03 Expired code: request a new one

Optional enhancements — Release 2: O01 Fingerprint sign-in with fallback; O02 Touch ID sign-in with fallback

3. View accounts and choose

Customer outcome: Know my balance and destination.

Main steps — MVP: S08 View accounts and balances; S09 Select eligible deposit account

Error/recovery variations — MVP: E04 Balance unavailable: show stale state; E05 Ineligible account: choose another

Optional enhancements — Release 2: O03 Remember preferred account

4. Capture the check

Customer outcome: Provide readable front/back images.

Main steps — MVP: S10 Prepare camera and check; S11 Take check-front picture; S12 Take check-back picture; S13 Preview and retake securely

Error/recovery variations — MVP: E06 Camera denied: enable or cancel; E07 Blurred or missing side: retake

Optional enhancements — Release 2: O04 Auto-capture with edge guides

Readable story map — continued

5. Enter and validate

Customer outcome: Provide correct check information.

Main steps — MVP: S14 Enter check amount; S15 Enter required check details; S16 Match images against details

Error/recovery variations — MVP: E08 Invalid amount or missing fields; E09 Image/detail mismatch: correct

Optional enhancements — Release 2: O05 Suggest amount; always verify

6. Review and submit

Customer outcome: Authorize one intended deposit.

Main steps — MVP: S17 Review account, amount, images; S18 Confirm and send e-check

Error/recovery variations — MVP: E10 Network timeout: check outcome; E11 Duplicate/fraud alert: block and explain

Optional enhancements — Release 2: O06 Resume an encrypted unsent draft

7. Track deposit and get help

Customer outcome: Understand the bank outcome.

Main steps — MVP: S19 Receive acknowledgement; S20 Refresh status and balance

Error/recovery variations — MVP: E12 Rejected/pending: show next action

Optional enhancements — Release 2: O07 View deposit history; O08 Opt into status notifications

8. Explore offers

Customer outcome: Discover optional bank offers.

Main steps — MVP: S21 View bank offers; S22 Open promotion details

Error/recovery variations — MVP: E13 Offers unavailable: continue banking

Optional enhancements — Release 2: O09 Choose personalized offers

Coverage of every section 18 mobile requirement

Requirement	Mobile capability	Map stories
18(a)	iPhone, Android, Windows Phone downloads	S01-S03
18(b)	Internet-portal credentials or other authentication	S05-S07; E02-E03; O01 fingerprint; O02 Touch ID
18(c)	View account balances	S08, S20; E04
18(d)(i)	Secure front and back check photographs	S10-S13; E06-E07; E11
18(d)(ii)	Enter amount and check details	S14-S15; E08
18(d)(iii)	Select the destination deposit account	S09, S17; E05
18(d)(iv)	Validate images against entered details	S16; E09
18(d)(v)	Deposit the e-check into the account	S17-S20; E10-E12
18(e)	Bank shares offers and promotions	S21-S22; E13; O09

Acceptance examples

• A valid deposit: sign in, view balances, choose an eligible account, capture front/back, enter amount, pass image/detail checks, review and submit once; receive a bank reference and status.

• A failed login: show a safe error, grant no account access, and offer retry or bank recovery. Expired alternative codes are rejected; biometric failures fall back to an approved method.

• A camera/image error: a missing permission, blurred image or absent check side blocks the affected step and gives a clear retry/retake route.

• A data mismatch: invalid amount or image-versus-entered-detail mismatch blocks submission until the customer corrects it.

• A submission timeout: check the existing request status before resending; an unknown result is not displayed as a successful cleared deposit.

• Banking without promotions: an unavailable offer never prevents viewing a balance or submitting a check.

Explicit assumptions and scope

The bank provides existing identity, remote-capture enrollment/eligibility, balances, check-validation and deposit-processing/status services. Alternative authentication may use a bank-approved verified code; fingerprint and Touch ID are optional, supported-device conveniences following bank authentication, with a non-biometric fallback.

Check images use protected temporary storage/transport and bank-side duplicate/tamper checks; “fraud-proof” in the vision is treated as a fraud-resistance requirement rather than an absolute guarantee. Bank acknowledgement, clearing and funds availability are distinct; the app displays bank-provided statuses and balances.

All three platforms in the fictional case remain explicit, including Windows Phone; real-world platform/store feasibility must be agreed before implementation. Desktop scanners, browser plug-ins, scanner purchases, portal account administration and bank-side clearing are outside this mobile map. Help links may use the existing bank support service; building that service is not mobile scope.

Source: supplied Case Study: Remote Deposit Capture, especially section 18(a-e), and the SampleStoryMap example. Optional improvements and detailed error behavior are reasonable product assumptions allowed by the assignment, not claims of implemented software.

Expanded customer stories

These stories provide the user need and benefit for every card on the map. Normal steps and error handling are MVP scope; optional enhancements follow in Release 2.

Story / priority	Customer need and benefit
S01 / MVP	As a customer, I want to install the iPhone app so that I can deposit from my iPhone. Trace: 18(a)
S02 / MVP	As a customer, I want to install the Android app so that I can deposit from my Android phone. Trace: 18(a)
S03 / MVP	As a customer, I want to install the Windows Phone app specified by the case so that the third required platform is included. Trace: 18(a)
S04 / MVP	As a customer, I want to check whether my existing bank account is eligible for remote capture so that I know how to prepare before depositing. Trace: 3-4; assumption
S05 / MVP	As a customer, I want to sign in using my internet portal account so that I can access my existing bank identity. Trace: 18(b)
S06 / MVP	As a customer, I want to use a bank-approved alternative such as a verified one-time code so that I have another supported authentication route. Trace: 18(b); assumption
S07 / MVP	As a customer, I want to sign out and have idle access locked so that my account is protected on a shared or unattended phone. Trace: 5,15; assumption
S08 / MVP	As a customer, I want to view bank-provided account balances with a refresh indicator so that I can understand my current funds. Trace: 18(c)
S09 / MVP	As a customer, I want to choose an eligible destination account so that the deposit goes to the account I intend. Trace: 18(d)(iii)
S10 / MVP	As a customer, I want to see camera and endorsement guidance so that I can prepare the check correctly. Trace: 18(d)(i); assumption
S11 / MVP	As a customer, I want to capture a clear check-front image so that the bank can read the front details. Trace: 18(d)(i)
S12 / MVP	As a customer, I want to capture a clear check-back image so that both required check sides are submitted. Trace: 18(d)(i)
S13 / MVP	As a customer, I want to preview, retake and protect temporary check images so that unreadable or exposed photos are avoided. Trace: 18(d)(i)
S14 / MVP	As a customer, I want to enter the check amount so that the bank receives my intended deposit value. Trace: 18(d)(ii)
S15 / MVP	As a customer, I want to complete other bank-required check fields so that my deposit information is complete. Trace: 18(d)(ii); assumption
S16 / MVP	As a customer, I want to validate captured images against the entered amount and details so that inconsistent check data is corrected before submission. Trace: 18(d)(iv)
S17 / MVP	As a customer, I want to review the complete deposit summary so that I can correct mistakes before authorizing it. Trace: 18(d)(ii-v)
S18 / MVP	As a customer, I want to authorize a secure submission to my selected bank account so that the bank can receive and process my e-check. Trace: 18(d)(v)
S19 / MVP	As a customer, I want to receive a bank reference and receipt so that I have evidence that my request was received. Trace: 18(d)(v); assumption

Story / priority	Customer need and benefit
S20 / MVP	As a customer, I want to view the bank-reported outcome and updated balance so that I can distinguish pending processing from funds available. Trace: 18(c,d)(v); assumption
S21 / MVP	As a customer, I want to view current bank offers in the app so that I can discover new banking opportunities. Trace: 18(e)
S22 / MVP	As a customer, I want to read offer conditions and the next action so that I can decide whether an offer is useful. Trace: 18(e)
E01 / MVP	As a customer, I want to see supported-device/setup guidance when installation or eligibility fails so that I can resolve the issue or contact the bank. Trace: assumption
E02 / MVP	As a customer, I want to see a safe login error and a bank recovery route after incorrect credentials so that I can recover without entering an unauthorized account. Trace: 18(b); error variation
E03 / MVP	As a customer, I want to retry a failed or expired alternative identity check so that an expired code does not grant access. Trace: 18(b); error variation
E04 / MVP	As a customer, I want to see when balances cannot be refreshed so that I do not mistake stale information for current funds. Trace: 18(c); error variation
E05 / MVP	As a customer, I want to see why an account cannot receive the check and select another eligible account so that I can correct the destination before sending. Trace: 18(d)(iii); error variation
E06 / MVP	As a customer, I want to get permission guidance when the camera is unavailable so that I can enable it or cancel safely. Trace: 18(d)(i); error variation
E07 / MVP	As a customer, I want to be told which check image is missing or unreadable so that I can retake that side before continuing. Trace: 18(d)(i); error variation
E08 / MVP	As a customer, I want to correct empty, nonnumeric or invalid deposit details so that invalid values are not sent as a valid deposit. Trace: 18(d)(ii); error variation
E09 / MVP	As a customer, I want to correct details or retake an image when validation detects a mismatch so that the bank receives consistent information. Trace: 18(d)(iv); error variation
E10 / MVP	As a customer, I want to look up the same request before retrying an interrupted submission so that I do not accidentally submit a duplicate check. Trace: 18(d)(v); error variation
E11 / MVP	As a customer, I want to receive the bank validation result for suspected duplicates or tampering so that a risky check is not presented as a successful deposit. Trace: 18(d)(i,iv,v); error variation
E12 / MVP	As a customer, I want to see the bank reason, pending status or rejection and reach support so that I understand the result without assuming that funds have cleared. Trace: 18(d)(v),7; error variation
E13 / MVP	As a customer, I want to skip unavailable promotions so that checking balances or depositing is never blocked by offers. Trace: 18(e); error variation
O01 / Release 2	As a customer, I want to opt into supported fingerprint authentication after bank verification so that I can re-enter conveniently and fall back to a bank-approved method. Trace: rubric enhancement; assumption
O02 / Release 2	As a customer, I want to opt into Touch ID on a supported iPhone after bank verification so that I can use biometric convenience without losing a recovery route. Trace: rubric enhancement; assumption

Story / priority	Customer need and benefit
O03 / Release 2	As a customer, I want to remember a preferred account while confirming it each time so that repeat deposits take fewer steps. Trace: optional assumption
O04 / Release 2	As a customer, I want to use framing guides and optional automatic image capture so that I can take clear pictures more easily. Trace: optional assumption
O05 / Release 2	As a customer, I want to review a suggested amount before accepting it so that typing is reduced without removing image/detail validation. Trace: optional assumption
O06 / Release 2	As a customer, I want to resume a protected unsent draft after signing in again so that I can continue interrupted preparation without duplicating a submitted check. Trace: optional assumption
O07 / Release 2	As a customer, I want to review earlier deposit references and outcomes so that I can find a previous deposit without resubmitting it. Trace: optional assumption
O08 / Release 2	As a customer, I want to receive optional deposit-status notifications so that I do not have to repeatedly refresh the app. Trace: optional assumption
O09 / Release 2	As a customer, I want to opt into personalization and dismiss unwanted offers so that promotions remain relevant and under my control. Trace: optional assumption
